Air Wipe Shim Set

The aluminum Standard Air Wipe has a .002" (.05mm) thick (red) shim installed. Plastic Shim Sets include (1) .001" (.03mm) thick shim (amber), (1) .003" (.08mm) thick shim (green) and (1) .004" (.10mm) thick shim (tan).

The aluminum Super Air Wipe and the stainless steel Super Air Wipe have a .002" (0.5mm) thick stainless steel shim installed. Stainless steel Shim Sets for the Super Air Wipe include (2) .002" (.05mm) thick stainless steel shims. Shims may be interchanged or stacked to change the air gap setting. The shim thickness sets the air gap opening. Larger air gaps give more flow and higher velocity. Air consumption doubles if the air gap opening doubles.
