

Air Holster® Safety Air Gun Mount INSTALLATION & MAINTENANCE

Model 5930 Air Holster

OVERVIEW

The Air Holster Safety Air Gun Mount is a simple and effective solution for keeping a safety air gun securely stored and easily accessible at any workstation. Designed for industrial environments, the Air Holster uses durable, permanent magnets and an open-cradle design to hold air guns, blowoff tools, and similar handheld equipment - including models fitted with extensions. By providing a dedicated storage location that accommodates extended tool lengths, the Air Holster helps reduce clutter, prevent misplaced tools, and promote safer, more organized work practices.

This guide outlines the proper installation and use of the Air Holster Safety Air Gun Mount. Following these instructions will ensure optimal performance and maintain a safe working environment. The information in this document is intended for operators, maintenance personnel, and supervisors responsible for workplace organization and safety compliance.

SAFE USAGE PRACTICES

- Use only on clean, flat, ferromagnetic surfaces.
- Do not exceed the stated maximum load.
- Avoid impacts or sudden pulls that could dislodge the magnets.
- Inspect regularly and replace if damaged.

WARNINGS

- Do not rely on the Air Holster to secure loads that could cause injury or damage if dropped.
- Do not use the Air Holster to support tools in critical or unstable positions, or in such a way that could put the workstation operator in danger.

MAXIMUM LOAD RATINGS

Maximum Load Rating tested with Air Holster installed on a clean, unpainted, 1-inch-thick steel surface.

Maximum Load: 20 lbs
